## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1745

1. Applicant's election of Group I in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Applicant has filed two claim 10's. One of them needs to be cancelled.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "non-conductive material" found in lines 1-2 of claim 9.

Claim 10, dependent on claim 9, falls therewith.

5. On page 20 of the present specification, line 12, "tlayers" is incorrect.

6. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign mentioned in the description: there is no #60 in Figure 4 as the present specification sets forth. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1745

8. Claims 1-4, 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Delahunt.

See column 4, line 22 through column 7, line 28 of the patent to Delahunt along with Figures 1 and 2 for the disclosure of the impregnated layer in the battery.

9. Claims 1-4 and 7-10 (2<sup>nd</sup> #10) are rejected under 35 U.S.C. 102(b) as being anticipated by Bruneau.

Reference is made to column 5, lines 57-63 for the impregnated separator as part of the battery in Bruneau. It is noted that the impregnation is a polymeric hot melt adhesive.

10. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by either Schmutz et al. (Schmutz) or Muller et al. (Muller)

Reference is made to Example 14 of Schmutz along with Figure 4 for the disclosure of the method of making a battery.

See Figure 5 of Muller and column 8, lines 23-45.

11. The following is an examiner's statement of reasons for allowance: none of the prior art of record discloses the impregnation of at least two layers in a battery nor does it teach the particular impregnation agent claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 703-308-1795. The examiner can normally be reached on Monday-Thursday from 6:15-3:45.
